– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: **Claims 6 and 14** claim a transfer seat being *modular and removable*, which is not supported by the disclosure.

Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show the extension arm assembly located substantially in front of the vehicle seat as described in the specification (Page 11, Line 8). Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings must also show every feature of the invention specified in the claims. Therefore, the *modular and removable transfer seat* must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Furthermore, each drawing should have a designated number, i.e. 3 or 3a, 3b...
Corrective action is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8, 10 – 13, 15 – 21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

With respect to Claim 8, the extension arm assembly located substantially in front of the vehicle seat, is neither adequately described in the specification nor supported by detail in the drawings.

Allowable Subject Matter

Claims 2 – 5, 7, 9, 18 and 20 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Crain et al (5,308,214) is cited for reference of a lifting apparatus for a vehicle, wherein the apparatus includes a transfer seat that is operative to transition between a seating configuration and a stowed configuration, the latter for positioning behind an original seat and being unable to support a user.

Crain et al teach further their extension arm assembly located substantially behind a vehicle seat and/or in front of a second seat when in the stowed configuration, as well as at the side of a vehicle seat when in a seating configuration.
